OASIS Contractor Capabilities

Core Discipline: Program Management Services

- Acquisition Support
- Cost Estimation and Analysis
- Program Management
- Program Documentation
- Project Management
- Risk Assessment and Mitigation
- Technical Planning
- Technical Assessment
- Requirements Management
- Risk Management
- Configuration Management
- Technical Data Management
- Vulnerability Assessment

Core Discipline: Engineering Services

- Systems Engineering
- Configuration Management
- Design Documentation and Technical Data
- Integration
- Life Cycle Management
- Operation and Maintenance
- Quality Assurance
- Requirements Analysis
- System Design
- System Integration
- Test and Evaluation
- Technical Documentation
- Architecture Design
- System Verification and Validation
- Baseline (Configuration) Management
- Data Management
- Risk Management
- Technical Planning
- Systems Engineering Training
- System Security and Information Assurance
- Software Development (for IT and non-IT requirements)
- Communications Engineering

Core Discipline: Logistics Services

- Analysis and Recommendation of Support Equipment
- Deployment Logistics
- Infrastructure Services Including Transportation and Delivery
- Integrated Logistics Support (ILS) Technical Requirement Creation
- Inventory Management
- Logistics Management and Support Services
- Logistics Operations Support
- Logistics Operations and Maintenance
- Repair and Alteration
- Supply Chain Management and Provisioning
- Test Range Support
- Life Cycle Sustainment
- Supportability Analysis and Implementation
- Integrated Logistics Support
