

## Mission-Grade Infrastructure

### SECURITY & COMPLIANCE

We meet stringent DoD, AT/FP, and SCIF standards to ensure secure access, classified information protection, and threat defense.

### BONDED

Bonding capacity of \$115M per project and \$400M aggregate reflects our strength in delivering large-scale, mission-critical work.

### COMMITMENT

We are committed to quality, safety, and environmental compliance through robust systems that ensure high performance and protection.

## Expeditionary Construction for Operational Readiness (CONUS & OCONUS)

Chugach Government Solutions' Construction Division delivers mission-ready infrastructure across CONUS and OCONUS locations with speed, precision, and proven performance. We provide full-spectrum design-build and design-bid-build services, including vertical and horizontal construction, SCIFs, utilities, and force protection. Our cleared, safety-certified teams excel in executing complex projects in remote and austere environments. From expeditionary logistics to sustainable building practices, Chugach delivers resilient infrastructure that supports national security and operational readiness.

# Core Competencies

## Design-Build / Design-Bid-Build

**Streamlined delivery under one team—reducing risk and improving speed, cost, and quality.**

- New construction
- Facility refurbishments
- Temporary /relocatable facilities
- Modular SCIFs
- Adaptive reuse projects

## General Construction

**Full-spectrum construction services tailored for DoD missions, built to meet structural, mechanical, and architectural requirements.**

- Hangars and F-22 Jet Engine Facilities
- Roadways, airfield upgrades, seawalls and revetments
- Shelters and storage facilities
- AFFF suppression systems removal and replace
- Civil infrastructure

## Construction Management

**Skilled managers oversee planning, budgeting, execution, and coordination to ensure efficient, compliant, and on-time project delivery.**

- Project supervision
- Stakeholder communication
- Schedule control
- Issue resolution.

## Anti-Terrorism/Force Protection

**Design and construction meet AT/FP standards to protect personnel and assets.**

- Blast-resistant and progressive collapse design
- Standoff barriers
- Perimeter security
- Hardened systems.

## Secure Environment Expertise

**Expertise in constructing secure and classified facilities that meet the highest federal and DoD standards, including permanent and modular SCIFs. We ensure full compliance with security protocols throughout all phases of execution.**

- Modular SCIFs
- Shielded enclosures
- Access control systems
- Secure utilities
- Classified facility upgrades

## Safety & Technology Integration

**We fuse safety and technology to enhance execution, protect personnel, and ensure compliance.**

- HeroWear exosuits,
- Walabot imagers
- Metaltech scaffolding
- 360° video monitoring
- Project management software
- AI-driven estimating tools
- EM 385-1-1 protocols

## Challenging Climates & Remote Locations

**Proven execution in remote, harsh environments with strong safety, quality, and schedule performance.**

**Includes: Arctic, island, and austere locations with complex logistics and planning.**
