Multi-Domain Logistics

INTEGRATED LOGISTICS

Providing End-to-end visibility and coordination to deliver enhanced situational awareness for tactical & operational logistics.

TEAM

Our skilled team has proven experience in OCONUS and CONUS operations, specializing in military and commercial logistics.

COMMITMENT

We are committed to strict environmental and safety compliance.

Total Package Solutions for Multi-Domain Logistics Support (CONUS & OCONUS)

Chugach Government Solutions (CGS) is a premier provider of Multi-Domain Logistics Support across Continental United States (CONUS) and Outside Continental United States (OCONUS) operations. We specialize in delivering cutting-edge logistics, supply chain management, and facility operations solutions to government, defense, and commercial sectors. Our expertise in AI-driven data analytics, advanced automation, and predictive maintenance ensures mission success in dynamic and challenging environments.

Core Competencies

Supply Chain Management

Providing end-to-end logistics lifecycle management

- Predictive analytics for demand forecasting
- Just-in-time inventory and demand planning
- Risk mitigation and supply chain resiliency

Logistics Common Operating Picture

Delivering enhanced situational awareness for operational logistics

- Real-time logistics visibility and operational coordination
- Advanced data visualization and dashboard reporting
- Integrated AI & data analytics for decision support
- Predictive analytics for asset tracking and resource allocation
- Secure communication and data encryption for logistics operations.
- Cyber resilience against threats in supply chain networks.

Automated Warehouse & Inventory Management

Providing asset management to enhance readiness and secure mission-critical resources

- RFID and IoT-based asset tracking of equipment, personnel, and supplies
- Automated inventory management
- Integration with existing logistics systems
- PHS&T: Military-grade packaging solutions
- Secure storage and asset preservation

Expeditionary & Contingency Logistics

Ensuring resilient, scalable sustainment of military operations in remote environments

- Rapid setup and sustainment of operational bases (man-camps)
- Field services including food, medical, and security operations
- Agile response to humanitarian aid and disaster relief missions

Airfield & Port Operations

Enabling efficient movement of personnel, equipment, and supplies

- Logistics support for airfield management and rapid deployment
- Airfield operations and ground support
- Runway maintenance and airspace coordination
- Compliance with FAA and military regulations
- Port operations for naval logistics sustainment

Transportation & Distribution

Ensuring swift, secure movement of personnel, equipment, and supplies for readiness

- Multi-modal transportation planning and execution (land, sea, air)
- Resilient and redundant logistics networks for contested environments
- Fleet coordination for mission-critical deliveries
- Compliance with international transportation regulations
- Rapid deployment and sustainment of forces worldwide

Maintenance, Repair, and Overhaul

Applying proactive, predictive, and adaptive maintenance for readiness

- Vehicle & Heavy Equipment Maintenance
- Preventive and corrective maintenance services
- Skilled workforce for heavy equipment support
- Rapid deployment of repair teams

Facility Maintenance and Operations

Ensuring military facilities stay operational, secure, and efficient

- Reliability Centered Maintenance Approach for Asset lifecycle management
- Preventive & Predictive Maintenance
- Safety, Compliance, & Emergency Response
- Corrective & Emergency Maintenance
- Facility Operations & Life Support
- Energy & Utilities Management
